Prima Power Software Solutions to Maximize Throughput

NC Express™

- User friendly, integrated, and automated tool for programming Prima Power equipment
- The system can be used as a single part drafting and tooling program or as a fully-automated machine tool management system
- CAD functions, 2D import, and 3D unfold (optional)

NC Express™ Unfold

Synchronized Tool Data

The tool and turret data in Tulus® and NC Express™ are synchronized: the tool names and sizes are the same in both tool libraries.

Thus, you can use the tools of the active turret in CAM software and minimize the tool changes in the production run.

NC Express™ Nest

NC Express™ Turret

Inventory control

Tulus® Coil line

- Monitor storage status
- Manage:
 - part
 - cassette
 - material inventory

Tulus® Cell

Tulus® Office

Tulus® Performance Reporting

Tulus® Web Information System

Tulus® Cell

- Control machine setup operation, tools, and laser
- Manage machining order, sorting & stacking
- View the status data of the machines and devices
- Graphical operation, tests, and diagnostics

Tulus® Office

- Schedule the machines with calendar
- Edit the active task list on the fly
- Monitor all the machines in one view

Tulus® Production Reporting

- Get reports of processed production
- Manage the raw material inventory

Tulus® Performance Reporting

- Get machine efficiency and utilization reports
- Get idle failure & time reports
- View production details and trend

Tulus® Web Information System

- Monitor the machine status, the active NC program, and the production run
- Know when the next machine stop is going to be
- Easy-to-use with Internet browser, for example with a computer, smartphone or tablet

Tulus® Mobile Information System

- Get information on machine performance directly to your mobile phone
- Foresee production requirements and minimize machine idle time
- Online information about production phase

Tulus® Mobile Information System
