CHAPTER 3. PRIMA INDUSTRIE GROUP PROFILE

The PRIMA INDUSTRIE Group is a market leader in the development, manufacture and sale of laser systems for industrial applications and of machines to process sheet metal, besides in the fields of industrial electronics and laser sources.

The Parent Company PRIMA INDUSTRIE SpA, established in 1977 and listed in the Italian Stock Exchange since 1999 (currently MTA - STAR segment), designs and manufactures high-power laser systems for cutting, welding and surface treatment of three-dimensional (3D) and flat (2D) components.

The PRIMA INDUSTRIE Group boasts 40 years of experience and has over 13,000 machines installed in more than 70 Countries. Owing also to the acquisition of the FINN-POWER Group in February 2008, it has stably ranked among world leaders in the sector of sheet metal processing applications. In recent years, the Group has reorganized its structure, branching its *business* in the following two divisions:

- PRIMA POWER for laser machines and sheet metal processing;
- PRIMA ELECTRO for industrial electronics and laser technologies.

The **PRIMA POWER** division includes the design, manufacture and sale of:

- cutting, welding and punching machines for three-dimensional (3D) and two-dimensional (2D) metallic components;
- sheet metal processing machines that use mechanical tools (punchers, integrated punching and shearing systems, integrated punching and laser cutting systems, panel bending, bending machines and automated systems).

This division owns manufacturing plants in Italy (PRIMA INDUSTRIE SpA and FINN-POWER ITALIA Srl), in Finland (FINN-POWER OY), in the United States (PRIMA POWER LASERDYNE LLC), in China (PRIMA POWER Suzhou Co. Ltd.) and has direct sales and customer service facilities in France, Switzerland, Spain, Germany, the United Kingdom, Belgium, Poland, Czech Republic, Lithuania, Hungary, Russia, Turkey, USA, Canada, Mexico, Brazil, China, India, South Korea, Australia and the United Arab Emirates.

The **PRIMA ELECTRO** division includes the development, construction and sale of electronic power and control components, and high-power laser sources for industrial applications, intended for the machines of the Group and third customers. The division has manufacturing plants in Italy (PRIMA ELECTRO SpA) and in the United States (PRIMA ELECTRO NORTH AMERICA LLC.), as well as sales & marketing facilities in the United Kingdom and China.

After 40 years of its establishment, the mission of the PRIMA INDUSTRIE Group continues to be that of systematically expanding its range of products and services and to continue to grow as a global supplier of laser systems and sheet metal processing systems for industrial applications, including industrial electronics, markets that demand top-range technology and where growth rates are quite good, though in the presence of a cyclical context.

This Company draft of Financial Statement was approved by the Board of Directors on May 8th, 2017.

CHAPTER 4

Introduction

CHAPTER 4 INTRODUCTION

The Interim Management Report at March 31st, 2017 of the PRIMA INDUSTRIE Group was prepared in accordance with the provisions of article 154-ter, paragraph 5 of Consolidated Finance Law et seq. in accordance with the International Financial Reporting Standards (IFRS) and with applicable Italian statutory regulations.

This report was approved by the Board of Directors on May 8th, 2017 and is published in accordance with the provisions of article 2.2.3 of Borsa Italiana SpA Regulations applicable to issuers listed in the STAR segment.

Quarterly data were not audited by the independent auditors.

It should be noted that, to improve disclosure of its financial results, the Group has decided, beginning financial year 2017, to present the income statement according to functional area, rather than by expenditure type, as done until the Consolidated Financial statements for the year 2016 (approved by the Shareholders' Meeting on April 11th, 2017). Therefore, the financial data presented in this Interim Report are presented according to functional area and, to facilitate comparison of the data from the current year with those of the corresponding period of the previous financial year have been reclassified in the same manner.

The company presents the income statement according to functional area, otherwise referred to as "at cost of the sale". This cost analysis is based on cost destination and is considered more representative than expenditure type. The form chosen conforms to internal reporting and business management procedures and is in line with international practice within the sector in which the Group operates.

"Cost of the sale" includes costs relating to the functional areas that participated directly or indirectly to the generation of revenues with the sale of goods and services. It includes all costs of materials, processing and overheads directly related to production.

ECONOMIC PERFORMANCE

The Groups ended the first quarter of 2017 reaching consolidated revenues of 89,483 thousand euro, increasing about 12.7% against the same period of the previous year.

Growth in turnover has now been steady over time and, as we can see in the chart below, over the last 3 years, the CAGR of Q1 revenues has been 11.5%.

Values in Euro million

This positive performance was the result of the significant investments made by the Group during the recent years and in particular those in research and development aimed to the renewal of the product range, to the development of the proprietary fibre laser source, as well as investments to strengthen its

presence on several geographic markets. A further accelerator of this growth has been the building of the new HQTC (*Headquarters & Technology Centre*) in Collegno (Torino). The HQTC, where all the Group product lines are exposed, was inaugurated at the end of May 2016 and continues to be visited by many customers from all over the world, contributing significantly to the Group orders acquisition.

FORESEEABLE DEVELOPMENTS OF MANAGEMENT

Although the first quarter of the year is seasonally weak, the first quarter of 2017 saw good results from the PRIMA POWER division. This was also down to the excellent performance in North America and China and the recovery seen in the PRIMA ELECTRO division, resulting from increased volumes of fibre lasers delivered. On the basis of our strong order book, confirmation of the positive climate on the market, we expect the growth trend to continue into the next quarters of the year.

CHAPTER 7. EXPLANATORY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

MARCH 31ST, 2017

ACCOUNTING TABLES FORM AND CONTENT

The Interim Management Report of the Prima Industrie Group at March 31st, 2017 was prepared on the basis that it is an ongoing concern and in accordance with the International Financial Reporting Standards (IFRS) and with applicable Italian statutory regulations.

The report includes the Balance Sheet, the Income Statement, the Comprehensive Income Statement, the Cash Flow Statement, the Changes in Shareholders' Equity and the Explanatory Notes.

From the financial year 2017, the company presents the income statement according to functional areas, otherwise referred to as "at cost of the sale". This cost analysis is based on cost destination and is considered more representative than expenditure type. The form chosen conforms to internal reporting and business management procedures and is in line with international practice within the sector in which the Group operates.

"Cost of the sale" includes costs relating to the functional areas that participated directly or indirectly to the generation of revenues with the sale of goods and services. It includes all costs of materials, processing and overheads directly related to production.

DRAFTING PRINCIPLES AND CRITERIA

Accounting criteria and principles of consolidation

The accounting criteria and principles of consolidation adopted for setting out the abbreviated consolidated balance sheet at March 31st, 2017 are compatible with those used for the consolidated annual balance sheet at December 31st, 2016, to which reference is made subject to the new standards/interpretations adopted by the Group starting from January 1st, 2017, as well as the adjustments required by the nature of the interim findings.

On-going concern

The condensed consolidated balance sheet at March 31st, 2017 has been set out on the assumption of the company continuing trading in that it is reasonably expected that PRIMA INDUSTRIE will continue with its operational activities in the foreseeable future.

Use of accounting estimates

The drawing up of an interim balance sheet requires the carrying out of estimates and assumptions which have effect on the values of revenues, costs, assets and liabilities of the balance sheet and on the information report relating to the potential assets and liabilities on the date of the interim balance sheet. If in the future, such estimates and assumptions which are based on the best evaluation by management, should differ through effective circumstances, they will be modified in an appropriate manner in the period in which the circumstance themselves vary. In particular, with regard to the condensed consolidated balance sheet of March 31st, 2017, the taxes on income for the period of the individual consolidated companies are determined on the basis of the best estimate possible in relation to the available information, and on a reasonable forecast of the progress of the financial year up to the end of the tax period.

The remaining 325 thousand EUR refers to some properties under construction held by the Company FINN-POWER ITALIA Srl located in Mantua, Italy.
